RDG100T/H

Wall-mounted room thermostats with LCD

RDG1..

for fan coil unit applications

for universal applications

for use with compressors in DX-type equipment

- RDG100..: Operating voltage AC 230 V, On/Off, 3-positon or PWM control outputs
- RDG110: Operating voltage AC 230 V, On/Off relay (SPDT) outputs
- RDG110U: Operating voltage AC/DC 24 V, On/Off relay (SPDT) outputs
- RDG100../RDG110..: Output for 1-speed and 3-speed
- RDG160T..: Operating voltage AC/DC 24 V, DC 0...10 V or On/Off control outputs
- RDG160T..: Output for 1-speed, 3-speed or ECM fan DC 0...10 V
- Operating modes: Comfort, Economy and Protection
- Automatic or manual fan speed
- 3 multifunctional inputs for keycard contact, external sensor, etc
- Automatic or manual heating/cooling changeover
- Adjustable commissioning and control parameters
- Minimum and maximum setpoint limitation
- Backlit display

Additional features of RDG100T, RDG160T.., RDG100T/H:

- Infrared remote control receiver
- Auto Timer mode with 8 programmable timers
- Auto timer can be disabled via P02
- Auto timer can be disabled via DIP switches (RDG160T..)
- Landscape design (RDG100T/H only)
- Selectable relay output functions (RDG160T..)

The RDG1.. room thermostats are designed for use with the following types of system:

Fan coil units via On/Off or modulating control outputs:

- 2-pipe system
- 2-pipe system with electric heater
- 2-pipe system and radiator/floor heating
- 4-pipe system
- 4-pipe system with electric heater
- 2-stage heating or cooling system

Chilled/heated ceilings (or radiators) via On/Off or modulating control outputs:

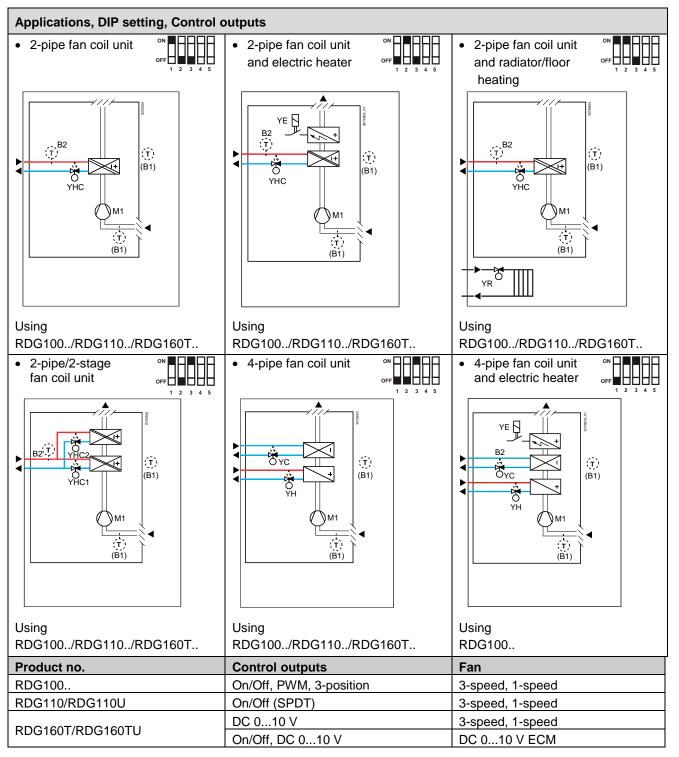

- Chilled/heated ceiling
- Chilled/heated ceiling with electric heater
- Chilled/heated ceiling and radiator/floor heating
- · Chilled/heated ceiling, 2-stage cooling or heating

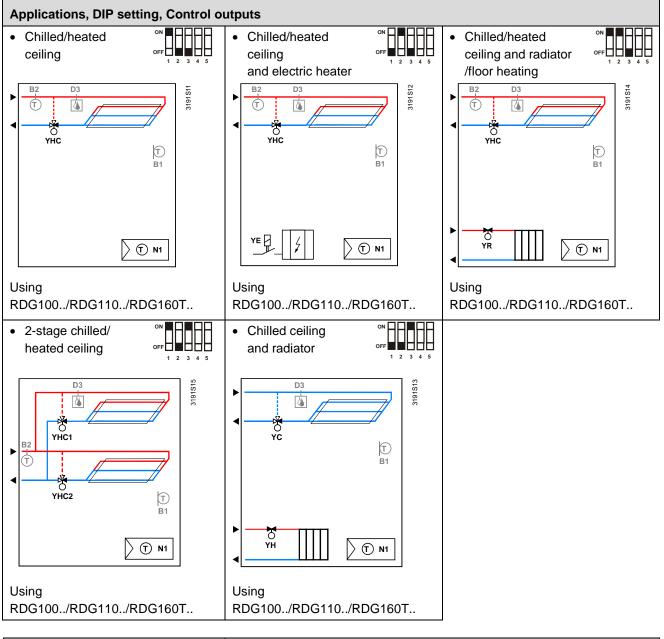

Heat pumps with dx-type equipment:

- 1-stage compressor for heating or cooling
- 1-stage compressor for heating or cooling with electric heater
- 1-stage compressor for heating or cooling and radiator/floor heating
- 1-stage compressor for heating and cooling
- 1-stage compressor for heating and cooling with reversing valve
- 2-stage compressor for heating or cooling

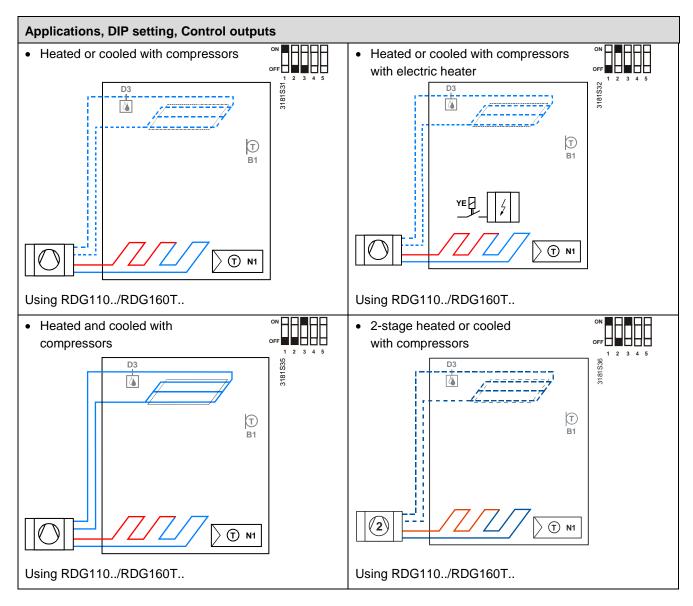

- Maintenance of room temperature via built-in temperature sensor or external room temperature/return air temperature sensor
- Automatic or manual changeover between heating and cooling mode
- Selection of applications via DIP switches
- Selection of operating mode via the operating mode button on the thermostat
- 1-speed, 3-speed or DC 0...10 V fan control (automatic or manual)
- Display of current room temperature or setpoint in °C and/or °F
- Minimum and maximum setpoint limitation
- Button lock (automatic or manual)
- 1 digital input, freely selectable for:
 - Operating mode switchover contact (keycard)
 - Automatic heating/cooling changeover contact
 - Electric heater enable
 - Dewpoint sensor
 - Fault input
- 2 multifunctional inputs, freely selectable for:
 - Operating mode switchover contact (keycard)
 - Automatic heating/cooling changeover sensor
 - External room temperature or return air temperature
 - Dewpoint sensor
 - Electric heater enable
 - Fault input
 - Supply air temperature sensor (RDG160T..)
- Advanced fan control function, i.e. fan kick, fan start, selectable fan operation (enable, disable or depending on heating or cooling mode)
- Purge function together with 2-port valve in a 2-pipe changeover system
- Reminder to clean filters
- Floor heating temperature limit
- Minimum and maximum supply air temperature limitation (RDG160T..)
- Reloading factory settings for commissioning and control parameters
- 7-day time program: 8 programmable timers to switch over between Comfort and Economy mode (RDG100T, RDG160T.., RDG100T/H)
- Infrared remote control (RDG100T, RDG160T.., RDG100T/H)
- Selectable relay function (RDG160T..)
 - For switching OFF external equipment OFF during Protection mode
 - For switching ON external equipment (such as. pump) during H/C demand
 - Output heating/cooling sequence
- Wizard function to select working temperature unit °C or °F (RDG160TU, RDG110U)

The room thermostats support the following applications, which can be configured via DIP switches at the rear of the unit. Depending on the thermostat type, On/Off or modulating control outputs are available.

Product no.	Control outputs
RDG100	On/Off, PWM, 3-position
RDG110/RDG110U	On/Off (SPDT)
RDG160T/RDG160TU	On/Off, DC 010 V

Product no.		Control outputs	Fan	
RDG110/RDG11	0U	On/Off (SPDT)	Disab	led, 3-speed, 1-speed

1) Infrared remote control must be ordered as a separate item

2) ECM fan output DC 0...10 V

3) On/Off, PWM or 3-position (triac outputs)

4) Relay output (SPDT)

5) Can be disabled via P02 (or via DIP switches on RDG160T..)

6) On/Off (relay output) or DC control signal

Noto	For more information about parallel operat	ion and the m	ovimum numbor	of actuators

Note For more information about parallel operation and the maximum number of actuators that can be used, refer to the Data Sheets of the selected type of actuator and the following list:

Maximum number of actuators in parallel on the RDG100..:

- 6 SS..31.. actuators (3-pos)
- 4 ST..23.. if used with On/Off control signal
- 10 SFA.., SUA.., MVI.., MXI.. On/Off actuators
- Parallel operation of SQS35 is not available

Maximum number of actuators in parallel on the RDG110..:

10 On/Off actuators

Maximum number of actuators in parallel on the RDG160T...:

- 10 SS..61.. actuators (DC)
- 10 ST..23/63/73.. actuators (DC or On/Off)
- 10 SFA.., SUA.., MVI.., MXI.. On/Off actuators
- 10 SQS65.. actuators (DC)

Ordering

Product no.	Stock no.	Designation
RDG100	S55770-T158	Room thermostat
RDG100T	S55770-T159	Room thermostat, with timer
RDG100T/H	S55770-T235	Room thermostat, with timer, landscape housing
RDG110	S55770-T160	Room thermostat with relay outputs (AC 230 V)
RDG110U	S55770-T361	Room thermostat with relay outputs (AC 24 V), UL certified
RDG160T	S55770-T343	Room thermostat with timer and DC (or On/Off) output for valve and fan (AC 24 V)
RDG160TU	S55770-T362	Room thermostat with timer and DC (or On/Off) output for valve and fan (AC 24 V), UL certified

Order the IRA211 infrared remote control separately.

Order valve actuators separately.

Order RDG110U and RDG160TU from BT US.

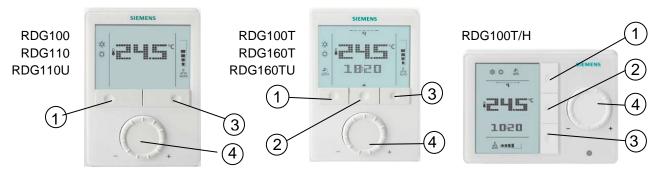

Mechanical design

The room thermostat consists of two parts:

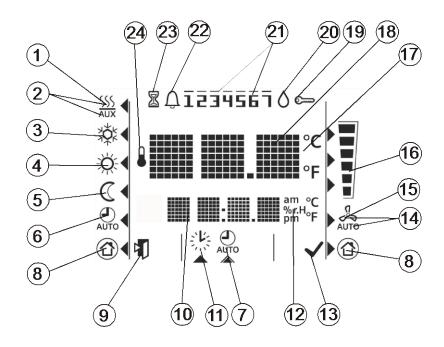

- Plastic housing which accommodates the electronics, the operating elements and the room temperature sensor
- Mounting plate with the screw terminals

The housing engages in the mounting plate and is secured with 2 screws.

Operation and settings

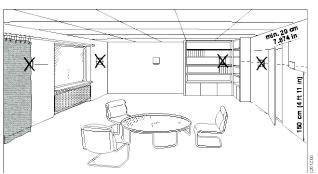

- 1 Operating mode selector/Esc
- 2 Button to enter the time and to set the timers
- 3 Fan mode selector/OK
- 4 Rotary knob for setpoint and parameter adjustment

Do not mount on a wall in niches or bookshelves, behind curtains, above or near heat sources, or exposed to direct solar radiation. Mount about 1.5 m (5 feet) above the floor.

• The room thermostat must be mounted in a clean, dry indoor place and must not be exposed to drip or splash water.

See Mounting Instructions (M3181, M3183, M3183.1 or M3183.2) enclosed with the thermostat.

• Comply with local regulations to wire, protect and earth the thermostat.

Warning!

No internal line protection for supply lines to external consumers (Q1, Q2, Q3, Yx or Yxx).

Risk of fire and injury due to short-circuits!

- Adapt the line diameters as per local regulations to the rated value of the installed overcurrent protection device.
- The AC 230 V mains or AC 24 V supply line must have a circuit breaker with a rated current of no more than 10 A. For AC 24 V US installations, use Class 2 rated power supplies.
- Properly size the cables to the thermostat, fan and valve actuators for AC 230 V mains voltage.
- Use only valve actuators rated for AC 230 V on RDG100.., RDG110 and on RDG160T if AC 230V is connected to the "L" terminal.
- Use only 3-speed fan rated with AC 24 V on RDG160TU.
- Isolate the cables of inputs X1-M/X2-M and D1-GND if the conduit box carries AC 230 V mains voltage.
- On the RDG100.. and RDG110, inputs X1-M and X2-M carry mains potential. If the sensor's cables are extended, they must be suited for mains voltage.
- Inputs X1-M, X2-M or D1-GND of different units (e.g. summer/winter switch) may be connected in parallel with an external switch. Consider overall maximum contact sensing current for switch rating.
- Selectable relay function (RDG160T..). Consider overall maximum current though the relays.
- Disconnect power supply before removing the thermostat from the mounting plate!

Mounting

Wiring

A

A

A

Commissioning	 Select the application via the DIP switches at the rear of thermostat before fitting the front housing to the mounting plate. Power up the thermostat after successfully connecting the line power. The thermostat starts to reset and all LCD segments flash, indicating that the reset was correct. After the reset, which takes about 3 seconds, the thermostat is ready for commissioning by qualified HVAC staff. The control parameters of the thermostat can be set to ensure optimum performance of the entire system (see Basic Documentation P3181).
Temperature unit selection wizard (only for RDG110U and RDG160TU) Notes	 The temperature unit selection wizard enables to select the preferable temperature unit display on thermostat between °C and °F. 1. Rotate rotary knob to select the preferable temperature unit. 2. Press the button ✓ (OK) to confirm the selection, and the thermostat goes to normal operating page. Pressing button ♥ (Esc) does not confirm the temperature unit selection. If the temperature unit is not selected, °C is used by default.
Control sequence	 The control sequence may need to be set via parameter P01 depending on the application. The factory setting for the 2-pipe application is "Cooling only"; and "Heating and cooling" for the 4-pipe application.
Compressor-based application	 When the thermostat is used in connection with a compressor, the minimum output on-time (parameter P48) and off-time (parameter P49) for Y11/Y21 (RDG110) must be adjusted to avoid damage to the compressor and shortening its life. Recalibrate the temperature sensor via parameter P05 if the room temperature displays on the thermostat does not match the room temperature measured.
Adaptive temperature compensation for el. heating	• If an electric heater is directly connected to output Y21, the load current of the electric heater should be indicated in parameter P46. (RDG110, Index D and higher only). Default setting: 1 A for loads up to 1 A.
Setpoint and setpoint range limitation	• We recommend to review the setpoints and setpoint ranges (parameters P08P12) and change them as needed to achieve maximum comfort and save energy.

Disposal

The devices are considered electronics devices for disposal in terms of European Directive 2012/19/EU and may not be disposed of as domestic waste.

- Dispose of the device via the channels provided for this purpose.
- Comply with all local and currently applicable laws and regulations.

 IP30 to EN60529

 Environmental Compatibility
 The product environmental declaration CE1E3181^{*}) and CE1E3181_1^{*}) contains data on environmentally compatible product design and assessments (RoHS compliance, materials composition, packaging, environmental benefit, disposal).

 General
 Connection terminals

 Solid wires or prepared stranded wires 1 x 0.4...2.5 mm² (14 gauge) or 2 x 0.4...1.5 mm² (16 gauge)

Note: For sensors on inp	outs X1, X2, or D1, the cabl	le length is max. 80 m (262 feet).
Wiring cross section on		Min. 1.5 mm ² (16 gauge)
L, N, Q1, Q2, Q3, Y1,	Y2, Y3, Y4, Y11, Y21	
Housing front color		RAL 9003 white
Weight	RDG100/RDG110	0.30 kg
	RDG160T	0.32 kg
